GameChanger Cable receives the  
Platinum Award at BICSI from  
*Cabling Installation & Maintenance*  
Magazine

# GameChanger Cable Takes Top Innovator's Award at BICSI

Paige DataCom honored by *Cabling Installation & Maintenance* 2017 Innovators Awards Program with the Platinum Award.

October 1, 2017 Paige DataCom Solutions, a leading innovator in cabling announced today that its GameChanger long reach 1080p Video Cable was recognized by the judges of the annual Cabling Installation & Maintenance Innovators Awards program. The judging panel consisted of cabling and communications system specifiers, designers, integrators and managers with vast professional experience.

Paige was honored with the Platinum-level award. Paige's GameChanger cable extends the reach for high definition

video and PoE+ to 850' without a repeater making it ideal for replacing CCTV and for use in applications that are beyond the 100m reach of a traditional category cable. This cable eliminates intermediate IDF requirements and the need to install repeaters or transceivers. With repeaters, this cable has been

shown to reach 4000' without an intermediate IDF. This saves money on installation and facilities.

Alan Bergstein, publisher of Cabling Installation & Maintenance ([cablinginstall.com](http://cablinginstall.com)) said "This prestigious program allows Cabling Installation & Maintenance to celebrate and recognize the most innovative products and services in the structured cabling industry. Our 2017 Honorees are an outstanding example of companies who are making an impact in the industry." The Innovators Awards are judged based on the following criteria:

- Innovative
- Sustainability
- Collaboration
- Value to the User
- Meeting a Defined Need
- Impact

The 2017 Cabling Installation & Maintenance Innovators Awards Honorees are featured in the November Issue of Cabling Installation & Maintenance magazine as well as on <http://www.cablinginstall.com>.

"We're thrilled to add 'award winning' to what our customers were already calling a 'Game Changer'," said David Coleman VP of Business Development. "We appreciate CI&M and BICSI recognizing the need and helping us promote the solution."  
- David Coleman, SVP Business Development

About Cabling Installation & Maintenance: Published since 1993, Cabling Installation & Maintenance has provided practical information to professionals responsible for the specification, design, installation and management of structured cabling systems in enterprises, data centers and campuses. Cabling Installation & Maintenance's magazine, website ([cablinginstall.com](http://cablinginstall.com)), email newsletters and webcasts help cabling professionals improve day-to-day operations and enable strategic planning for their networks' optimum long-term performance.

About The Cabling Installation & Maintenance 2017 Innovators Awards program: The Cabling Installation & Maintenance 2017 Innovators Awards program reviews and recognizes the most-innovative applications of cabling and communications technology products and systems within the structured cabling industry. Platinum, Gold, and Silver Honorees were announced at BICSI's 2017 Fall Conference in Las Vegas on Monday, September 25, 2017. Criteria used in the Innovators Awards ranking included: innovation, value, sustainability, collaboration, and impact.
